Regional Perspectives as of 3/31/12⁽¹⁾

INTERNATIONAL EQUITY

Region	Ending Weight ⁽²⁾		Comments
Western Europe	39.7%	Opportunities:	Story of the haves and have-nots. Northern European nations better off than Southern European ones. Latest funding approval for Greece provides temporary reprieve, may ultimately default though on debt. German economy still the leader in Europe, though showing signs of slowing.
		Risks:	European banks still dealing with Greek sovereign debt exposure, however European Central Bank begins to help. Rating downgrades continue, are France and Germany next? Political resolve necessary to keep European Union together.
		Portfolio Positioning:	We continue to avoid companies with PIIGS (Portugal, Ireland, Italy, Greece or Spain) exposure and European banking institutions.
Pacific Rim	20.6%	Opportunities:	Growing incomes of citizens provide future consumers for companies operating in Asia. Appreciating Chinese yuan would lower inflation and make imports cheaper.
		Risks:	Concerns surfacing about potential Chinese real estate bubble. Slowdown in European economies reverberates in emerging Asia.
		Portfolio Positioning:	Diversified holdings across Industrials, Telecommunications, Energy and Information Technology.
North America	18.9%	Opportunities:	Canada - lower unemployment and budget deficits in comparison to United States. Mexico benefiting from rebounding U.S. economy.
		Risks:	Countries subject to commodity price fluctuations.
		Portfolio Positioning:	Diverse exposure, strong results from Consumer Staples holdings this quarter.
South America	15.1%	Opportunities:	Brazilian investment plan for 2014 World Cup and 2016 Olympics continues to progress. Commodity reserves (oil, minerals) remain strong, to benefit exporters as prices remain elevated.
		Risks:	Increasing government intervention in Brazilian business sector. Lower global GDP could hurt commodity export driven economies. Stronger currencies could weigh on export growth.
		Portfolio Positioning:	We look to maintain overweight in this region, with focus on Brazil, a country we deem a long-term winner for investors.
Eastern Europe	3.8%	Opportunities:	Growing middle class creating sustainable domestic consumption.
		Risks:	Geopolitical and regulatory risk must always be evaluated. Drop in commodity prices could hurt the Russian economy.
		Portfolio Positioning:	Current exposure limited to oil and gas conglomerates.
Middle East	1.9%	Opportunities:	New political regimes could open markets to new investors.
		Risks:	Geopolitical tensions present challenges to the equity markets.
		Portfolio Positioning:	Currently limited opportunities on our Focus List. Only exposure to Israel.
