84 years of Combined Investment Experience - *Equity Ownership - Open and Candid Communication

Teamwork Wins

High Active Share

- Portfolio is constructed with approximately 20 high quality companies characterized by abundant free cash flow, low debt, high ROE, strong revenue growth, stable to improving margins, and shareholder oriented management teams
- *Best Ideas Portfolio* – Impartial to index sector weightings and index position weightings

Time Arbitrage

- Long-term focus on company fundamentals and competitive advantages
- Portfolio returns are generated through the compound earnings growth of competitively advantaged companies owned for many years – *Share prices follow earnings growth*
- Portfolio has included slightly more than 100 companies since inception – *Avg. holding period approximately five years*

Weighing Machine vs. Voting Machine

- No market predictions – fully invested at all times
- Unemotional selling – an absolute return mentality

Risk Management (“Don’t lose” mentality)

- Only invest in financially superior/competitively advantaged businesses – *Margin of Safety*
- Do not over-diversify into marginal/poor businesses
- Portfolio construction parameters include position size limits and sector weight limits
- Strict and disciplined focus on long term preservation of capital

Time-Tested Process

- Over 25 years of evidential success through consistent application of investment process

Total assets and UMA assets are supplemental information to the Annual Disclosure Presentation.

*Performance disclosures are located on the following page.

GIPS Disclosure

*Performance represents partial period (January 1, 2015 through March 31, 2015), assets and accounts are as of 3/31/15. **2015 3 Year Standard Deviation is as of 3/31/15.

The Large Capitalization Equity Composite created on January 1, 2006 contains fully discretionary large cap equity accounts that are not managed within a wrap fee structure and for comparison purposes is measured against the S&P 500 and the Russell 1000 Growth indices. Polen Capital invests exclusively in a portfolio of high quality large cap and liquid companies.

Polen Capital Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Polen Capital Management has been independently verified by Ashland Partners & Company LLP for the periods April 1, 1992 through September 30, 2014.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Large Capitalization Equity Composite has been examined for the periods April 1, 1992 through September 30, 2014. The verification and performance examination reports are available upon request. Polen Capital Management is an independent registered investment adviser. The firm maintains a complete list and description of composites, which is available upon request. In July 2007, the firm was reorganized from an S-corporation into an LLC and changed names from Polen Capital Management, Inc. to Polen Capital Management, LLC.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. As of July 1, 2002, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash outflow of 10% or greater of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite the first full month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual management fees. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The management fee schedule is as follows:

Institutional: Per annum fees for managing accounts are 75 basis points (.75%) on the first \$50 Million and 55 basis points (.55%) on all assets above \$50 Million of assets under management. HNW: Per annum fees for managing accounts are 150 basis points (1.5%) of the first \$500,000 of assets under management and 100 basis points (1.0%) of amounts above \$500,000 of assets under management. Actual investment advisory fees incurred by clients may vary.

Past performance is not necessarily indicative of future results and future accuracy and profitable results cannot be guaranteed. Performance figures are presented gross of management fees and have been calculated after the deduction of all transaction costs and commissions. Polen Capital is a SEC registered investment advisor and its investment advisory fees are described in its Form ADV Part 2A. The advisory fees will reduce client's returns. The chart below depicts the effect of a 1% management fee on the growth of one dollar over a 10 year period at 10% (9% after fees) and 20% (19% after fees) assumed rates of return.

The S&P 500® Index is a widely recognized, unmanaged index of 500 common stocks which are generally representative of the U.S. stock market as a whole. The Russell 1000® Growth Index is an unmanaged index that measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values.

The information provided in this document should not be construed as a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain the composite or that the securities sold will not be repurchased. The securities discussed do not represent the composite's entire portfolio. Actual holdings will vary depending on the size of the account, cash flows, and restrictions. It should not be assumed that any of the securities transactions or holdings discussed will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein.
