## Quarterly Commentary

Following the pronounced declines seen in the 3rd Quarter, the US equity markets saw a rebound in performance during the 4th Quarter. Although the 3rd Quarter decline was led by Small Cap stocks, the 4th Quarter bounce was led by larger cap stocks. This solidified 2015 to be the 2nd year in a row where US Large Cap beat US Small Cap. Large Cap managed to eke out a positive gain for the year driven by the strong 4th Quarter bounce (the S&P 500 returned 7.0% in the 4th Quarter and 1.4% for calendar year 2015). The same cannot be said for Small Cap, where the Russell 2000 delivered a 3.6% return in the 4th Quarter, but ended 2015 with a negative 4.4% return (the Russell 2500 finished with a fourth quarter return of 3.3% and 2015 return of negative 2.9%). Small Cap Value investors bore the brunt of the bad news with the Russell 2000 Value Index underperforming all the primary Russell US equity indices at -7.5% for 2015. SMID Value, as represented by the Russell 2500 Value Index, fared a little better, returning -5.5% for the year. Also of note, 2015 was the 6th in the past 7 years that Small Cap Growth (represented by the Russell 2000 Growth Index) has beaten Value. Since the recent bull market began in 2009, only the year 2012, sandwiched between 2009 – 2011 and 2013 – 2015, saw Small Cap Value beat Small Cap Growth.

For the GW Capital Small Mid Cap portfolio, we again underperformed both the Russell 2500 and Russell 2500 Value indices. The portfolio fared worse against the Core index given the outperformance of Growth during the quarter.

In terms of attribution, Sector Allocation had a relatively neutral impact during the quarter, whereas Issue Selection caused the bulk of the underperformance.

Starting with Sector Allocation, the greatest detractor against the Value index was the overweight to the poor performing Consumer Discretionary sector as well as the underweight to the better performing Financials sector. Against the Core index, the portfolio's underweight to Technology and Healthcare detracted modestly. On the plus side, the portfolio's underweight to poor performing Energy sector gave the largest boost.

With Issue Selection, the portfolio had some very strong performers during the quarter. In fact, 9 securities returned in the positive double-digit range. Unfortunately, the portfolio also featured 7 names that returned in negative double-digits for the quarter, which basically cancelled out all the good. Top contributions came from stocks in the Utilities, Technology, and Consumer Staples sectors as 4 of the top 5 portfolio performers came from those sectors. Worst returning stocks were in Energy, Financials and Healthcare.

Portfolio turnover was about average last quarter. We had 2 new purchases into the portfolio as well as 2 outright sells. Both of the sells were long-term Financial stock holdings, but their impact on the portfolio were very different. One long-term holding had been a top tier performing and contributor of alpha, while the other was an underperformer that had dragged down portfolio returns. We also added to 2 existing holdings while paring back on 2 other positions that had been outperforming.

## Quarterly Commentary

As with last quarter, we end the 4th Quarter less optimistic regarding the US and Global economies than we started it. This view derives not only from concerns regarding global growth (we've noted our cautious eye toward China for a while now), but more specifically focusing on US high yield bond spreads. These spreads now exceed their 25-year historical average after widening almost 200 bps during 2015. In fact, high yield spreads are nearly double where they were at the end of 2nd Quarter 2014 and at levels not seen since year-end 2011 (which followed the previous Greek crisis and S&P's downgrade of US Treasuries). As long-term believers that corporate yield spreads most often lead equities (our canary in the coal mine), we view this action as a more distinct waving of the caution flag. This cautious view is balanced by the modest economic growth seen in the 3rd Quarter of 2.0% following the strong 3.9% bounce seen in the 2nd Quarter (revised up significantly from the initial report). Expectations are for a further decline in growth to below 1% in the 4th Quarter. Employment reports remain mixed as the unemployment rate hangs around 5%, but less jobs are being added, especially when compared to 2014. Geopolitical risks along with economic and monetary issues behind other major currencies have maintained strength for the US Dollar. Even with the caution flag waving, the US economy remains an oasis of growth in the global economy, although at modest levels. This combination of good and bad has us maintaining our economic outlook of Two steps forward – One and a half steps back.

For a complete list of GW Capital's past specific recommendations holdings report for the composite for the last year as of the current quarter end, and current holdings for the Composite as of the current quarter end, please contact Jennifer Wheat at (425) 455-4551. Although the statements of fact and data in this report have been obtained from, and are based upon, sources that the firm believes to be reliable, we do not guarantee their accuracy, and any such information may be incomplete or condensed. Past performance is not a guarantee of future results. Investing in stocks entails the risks of market volatility. The value of all types of stocks may increase or decrease over varying time periods. Small-capitalization companies may lack the financial resources, product diversification and competitive strengths of larger companies. In addition, the securities of small-capitalization companies may not trade as readily as, and be subject to higher volatility than, those of larger, more established companies. Portfolios that invest a large percentage of assets in only one industry sector (or in only a few sectors) are more vulnerable to price fluctuation than portfolios that diversify among a broad range of sectors. Investors cannot invest directly in an index. The performance of unmanaged indexes reflects no deductions for fees, expenses or taxes which would affect performance of actively managed assets.*
